PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building scalable backend systems, designing relational databases, and engineering SQL-driven analytics pipelines. Proficient in data processing, query optimization, and REST API development using Node.js and Python. Seeking an entry-level Data Engineer or Backend Data Developer role to contribute to data pipeline development, database optimization, and analytics system design.

EDUCATION

Bachelor of Technology in Computer Science and Engineering - 2024-2028
Dr. A.P.J. Abdul Kalam Technical University (AKTU) - CGPA: 8.0

TECHNICAL SKILLS

Languages: JavaScript, C, C++, Java, Python
Backend & Data Engineering: Node.js, Express.js, SQL, MongoDB
Data & Analytics: SQL (Joins, Aggregations, Indexing)
Core Concepts: Database Design, Query Optimization, Data Processing, OS, CN, REST APIs, DS & Algorithms
Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA **Frontend (Basic):** React.js, Tailwind CSS

PROJECTS

AI INTERVIEW AGENT PLATFORM

React.js | *Node.js* | *Express.js* | *REST APIs* | *Firebase Authentication* | *Gemini* |*Database Optimization*

- Developed an AI-powered interview preparation platform with real-time voice interaction using Speech Recognition API and Gemini.
- Built secure authentication and user management features using Firebase Authentication and role-based access control.
- Designed RESTful APIs and MongoDB database architecture to manage interview session, user profile, feedback analytic.
- Implemented interactive dashboards with data visualization to track interview progress, scores and skill improvement trends.
- Integrated PDF report generation and AI-driven feedback systems to provide personalized interview assessments and downloadable.

E COMMERCE ONE CART

React.js | *Node.js* | *Express.js* | *MongoDB* | *Redux Toolkit* | *REST APIs*

- Developed a scalable full-stack e-commerce platform with user authentication, product management, shopping cart and order processing.
- Built an Admin Panel to manage products, users, inventory and customer orders efficiently.
- Designed RESTful APIs and MongoDB database schemas for secure and scalable data management.
- Implemented Redux Toolkit for state management and optimized application performance.
- Integrated Payment Gateway functionality and sales analytics for enhanced business operations.

ACHIEVEMENTS

- Solved 450+ DSA problems on LeetCode and GeeksforGeeks, demonstrating strong proficiency in Data Structures and Algorithms.
